Databases & Cloud: SQL Server, MySQL, Supabase, AWS (VPC, EC2, Aurora), Vercel, Netlify, Linux CLI, z/OS

Concepts: OOP, Data Structures, Relational Design (ERD, 3NF), REST APIs, Software Testing, Agile

EXPERIENCE

Founder | VAO — **2026 → Present**

- Founded a technology company building apps, websites and games, growing a network of developers, designers and artists on base pay or commission.

Freelance Full-Stack Developer | Self-employed — **2026 → Present**

- Design, build and deploy full-stack client websites end to end, from mockup to launch.
- Clients include M&S Hosting Solutions, a GTA short-term rental company.

AI Data Annotator | Handshake AI, Remote — **Jun 2026 → Present**

- Annotate and evaluate data used to train and improve AI models.

AI Trainer | Outlier AI, Remote — **Apr 2026 → Aug 2026**

- Wrote, reviewed and rated model responses for accuracy and quality.

Tech Support and Maintenance | Skyfarm Food Mart — **May 2025 → Jan 2026**

- Kept store systems and equipment running through troubleshooting, repairs and routine maintenance.

PROJECTS

M&S Hosting Solutions | mshostingsolutions.ca — **2026**

Freelance Full-Stack Developer | Next.js, Supabase, Tailwind CSS, Resend, Vercel

- Built the live marketing site for a GTA short-term rental company, designed around their real properties and brand.
- Took the project from homepage mockup with the client's real property data through build and deployment on Vercel.

Keyboard Warriors | Capstone Project — **2025**

Game Developer | Godot 4, C#, Git

- Built a PC typing game that helps middle school students build typing skills by defeating waves of enemies in real time.
- Implemented live input matching, difficulty-scaling waves, a power-bar mechanic and a 3-life health system, plus a full UI flow from main menu to game over.

Lakeridge Community Hospital Database — **Aug 2025 → Nov 2025**

Database Designer | SQL Server (SSMS), ERD, 3NF

- Designed a 3NF relational database for patients, bookings, billing, staff and activity tracking, with integrity enforced through PK and FK constraints.
- Wrote SQL queries for reporting, revenue analysis and auditing.

CouldItBeThisSWAG | Personal Shopping & Styling Platform — **In Progress**

Founder & Developer

- Personal shopping and styling service: clients build a wishlist, connect with a personal shopper or stylist, and get pieces from designers, luxury brands and artists delivered.
